System Requirements:

For now we are only supporting the "standard" i.e. 1.6GB Xbox Live size game that will take you approximately 15 minutes to finish, however, many 2GB+ games are being made now and will take around 2-3 hours to finish the story. We have a huge number of games (over 150) waiting to be loaded in to the Xbone but we are still waiting for the hardware itself to be fully released. If you have a full version of XBLA Game for Xbox Live you will need to change the default setting to Xbox One.
